Career Objective

Frontend Developer with 1.3 years of experience building responsive, user-friendly web applications using React.js, Next.js, HTML, CSS and JS. Enthusiastic about crafting intuitive user experiences and understanding browser behavior to create elegant, scalable interfaces that focus on performance and usability. Seeking a growth-focused role to contribute to impactful and exciting projects while continuously enhancing technical expertise.

Technical Skills

Frontend: JavaScript (ES6+), React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Express.js, Payload CMS, Firebase .

Authentication: JWT, Firebase Auth, Google OAuth, NextAuth.js

Database: MongoDB, PostgreSQL, Firebase Firestore.

DevOps & Deployment: Git, GitHub, Vercel, Netlify, Firebase Hosting, VS Code, Chrome DevTools.

Professional Experience

Software Engineer(Intern) — 5th January 2026 - Present

Solvrz.com (Startup) — **Remote**

- Developed and maintained web application features and contributed to a **web-based AI agent builder platform** using **JavaScript, React.js, Next.js, Express.js, and MongoDB.**
- Built responsive and user-friendly interfaces while integrating frontend components with backend services through **RESTful APIs**.
- Collaborated with team members using **Git and GitHub** for version control and code reviews .
- Debugged and optimized application performance to improve efficiency and stability.

Projects

1. SparkFit – A full-featured fitness web platform that connects users with certified trainers and builds a fitness community.
   Tech Stack: React, Express.js, Tailwind CSS, Firebase, MongoDB.
   - Implemented role-based dashboard to strengthen access control, improve usability and protected routes.
   - Developed an admin-controlled trainer approved management system with review and detailed feedback.
   - Engineered an interactive booking and payment flow with Stripe.js integration.
     Live-site | Frontened-repository | Backened-repository

2. Sunset Diary – A modern blogging web application to share stories and explore diverse content.
   Tech Stack: React, Express.js, Tailwind CSS, Firebase, MongoDB.
   - Implemented Firebase Authentication for secure user registration, login, and protected routes.
   - Developed a full-featured CRUD operation for users to create, edit and manage blogs with real-time updates and delete.
   - Integrated like, comment and search functionality to boost user engagement using React and MongoDB.
     Live-site | Frontend-repository | Backend-repository
